VR Series Wireless IP C-Mount Camera	Model: WIPCAM

This Wireless High Resolution H.264 IP camera has a built-in web server that can be used to view and administrate the camera. In addition, the camera comes with our exclusive 16 channel VR Series Virtual DVR Client software. The Virtual Client will allow you to view and record the camera over the network, and to combine the camera with other VR Series components to create a complete enterprise-wide security solution.
